## *Press Release*

### **HK Audio unveils new Power Rack solutions for rental products**

*May 18 2017, Sankt Wendel, Germany*

HK Audio has introduced a powerful new pair of Power Racks for the rental sector: the Power Rack 8 PLM+ and the Power Rack 16 PLM+.

A much-requested addition to the HK Audio product portfolio, the new racks are the result of design and research conducted with the needs of the modern-day customer in mind. They consist of the new **HK Audio Patchbay PB-8** (an upgrade of the older PB-6 models) and the **Lab.GRUPPEN PLM+ 12K44** controller amp: the Power Rack 8 PLM+ contains one of each item, and the Power Rack 16 PLM+ two.

Key in the thinking behind the new Power Racks was their suitability to the marketplace in 2017 and beyond, so the new systems feature everything the contemporary rental customer could require: state-of-the-art technology, impressive power to effortlessly drive sizeable systems, extremely low latency, flexible ease of use across a range of applications, an affordable price point, and the excellent sound reproduction standards HK Audio users expect.

**Marc-Oliver Mayer**, HK Audio Product Manager (Rental & Installation), said: "We always want to respect the needs of the HK Audio customer, and this time their requirements were clear. They wanted a technologically up-to-date and universally usable tool to power all their rental applications, and this is exactly what we have given them. The new Power Racks are a one-stop solution for so many different sound reinforcement situations, because they can power any HK Audio rental system."

The Power Rack 8 PLM+ and the Power Rack 16 PLM+ are available now. For more information, visit the HK Audio website.
